EXECUTIVE SUMMARY

Analytical and highly adaptable Computer Science undergraduate specializing in Database Technology, with hands-on expertise in data engineering, machine learning, and business intelligence. Proven track record of spearheading ETL workflows, architecting dimensional data warehouses, and formulating actionable data visualizations utilizing Python, SQL, Power BI, and Tableau. Eager to leverage a robust analytical mindset and cross-functional leadership experience to drive data-informed decision-making and optimize technical solutions as a Data Analyst, Data Engineer, or Business Intelligence Analyst.

EDUCATION

Bina Nusantara University (BINUS) - ***Jakarta & Bandung, Indonesia*** **2024 - 2028**
Majoring Computer Science, Streaming Database Technology **| Cumulative GPA:** 3.64 / 4.00
Relevant Coursework: Data Analytics, Data Engineering, Software Engineer, Data Mining, Basic Statistics, Web Programming, Big Data Processing, Artificial Intelligence, Data Visualization.

KEY SKILLS

Data & Analytics: SQL, Python (Pandas, NumPy, Scikit-learn), Data Cleaning, Exploratory Data Analysis (EDA), Machine Learning, Natural Language Processing (NLP).
Data Engineering & BI: Pentaho ETL, MySQL, Dimensional Modeling (Star Schema), Power BI, Tableau.
System Analysis & UI/UX: Requirements Gathering, UML Modeling, Human-Computer Interaction (HCI) Principles, Figma, Draw.io.
Languages: Indonesian (Native), English (Proficient).

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

HIMTI BINUS University - ***Bandung, Indonesia***
Manager of Publication & Marketing **January 2026 - Present**
- Directed a 12-member team to formulate and execute comprehensive digital marketing campaigns, media partnerships, and event publications.
- Orchestrated cross-functional collaboration to optimize content creation and social media workflows, significantly elevating the organization's outreach and event engagement.

Staff of Registration Division, HILET 2026: Interstellar Leadership Mission, HIMTI BINUS University **December 2025**
- Executed administrative registration processes and managed participant data, ensuring a highly organized and seamless event entry flow.
- Collaborated with the operational team to optimize registration logistics and support overall event execution.

Coordinator of Registration & Finance, HIMTI SESVENT Jakarta-Bandung 2025 **October 2025**
- Managed end-to-end participant registration and maintained accurate database records to ensure streamlined administrative operations for a major organizational event.
- Monitored comprehensive financial administration and budget tracking, maintaining strict transparency of all event-related expenditures and income.

BINUS University - ***Bandung, Indonesia*** **September 2025 - January 2026**
Freshmen Partner
- Mentored new students to facilitate their successful transition into the academic environment by navigating university systems and providing practical guidance.
- Facilitated learning sessions as a teaching assistant, effectively resolving academic inquiries and strengthening student engagement during foundational coursework.

Alumni Legacy, BINUS Bandung - ***Bandung, Indonesia*** **October 2025**
Treasurer & Usher
- Administered precise financial records and reconciliation processes for event-related income and expenses, ensuring accurate budget tracking.
- Facilitated seamless event operations by guiding guests and resolving on-site logistical challenges proactively.

ACADEMIC PROJECTS

- **Book-Crossing Community Insight (Data Engineering & BI), BINUS University**
  Architected an end-to-end ETL pipeline and star-schema data warehouse using Pentaho and MySQL to validate 111,585 ratings, while designing interactive Power BI dashboards for multidimensional analysis.
- **Subscriber Prediction Model (Machine Learning), BINUS University**
  Engineered a predictive classification model using Python and Scikit-learn (Logistic Regression) on 3,900 customer records, achieving an 86.41% accuracy and a 91.40% ROC-AUC score to identify potential subscribers.
- **IMDb Movie Review Sentiment Analysis (NLP), BINUS University**
  Developed a Multinomial Naive Bayes classifier utilizing TF-IDF and NLTK to evaluate 50,000 movie reviews, successfully achieving an 85.53% test accuracy in sentiment prediction.
- **Customer Shopping Behavior Analysis (Data Visualization), BINUS University**
  Formulated four interactive Tableau dashboards analyzing 3,900 transaction records to visualize product performance, marketing effectiveness, and customer loyalty patterns.
- **Isyaratku – AI-Powered Sign Language Learning Platform (System Analysis & UI/UX), BINUS University**
  Designed an accessibility-focused web application interface in Figma and performed comprehensive system analysis to translate learning challenges into validated functional requirements.
- **Sigma Coffee Ordering & Loyalty App (UI/UX Design), BINUS University**
  Structured end-to-end customer journeys and conceptualized user interfaces in Figma to streamline product customization, payment, and loyalty workflows based on HCI principles.
- **Battery Rental System (System Analysis & UML Modeling), BINUS University**
  Modeled complex business processes by developing comprehensive UML documentation (Use Case, Activity, Class, and State Transition diagrams) utilizing Draw.io to define structured system behavior.
